SUMMARY

Results-driven Frontend Developer with 1+ years of professional experience at Techno Masr, specializing in building dynamic, responsive, and performance-optimized web applications using React.js and Next.js. Proficient in TypeScript, Tailwind CSS, and Redux Toolkit. Experienced in implementing complex UI features, including 3D web elements and comprehensive Right-to-Left (RTL) localization for Arabic platforms. Dedicated to writing clean, scalable code aligned with UX/UI best practices.

EXPERIENCE

Frontend Developer | Techno Masr (Full-time)

June 2025 – Present

- Developed and maintained high-performance web applications using React.js, Next.js, and modern styling frameworks (Tailwind CSS, Bootstrap).
- Specialized in building seamless Right-to-Left (RTL) layouts and localization for major Arabic-language platforms, ensuring flawless user experiences.
- Collaborated with UI/UX designers and backend teams to integrate RESTful APIs and optimize front-end performance.
- Built interactive feature sets, including 3D model viewers (Three.js / React Three Fiber) and highly interactive user dashboards.

Freelance Frontend Developer (Self-employed)

Dec 2024 – May 2025 (6 months)

- Implemented responsive designs and reusable components using React.js, improving mobile user experience.
- Optimized API calls and rendering, which decreased API response times by 25%.

EDUCATION

Mansoura University

Bachelor's degree in Computer Science

Graduation Year: 2022 – 2023

SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js

Styling & Frameworks: Tailwind CSS, Bootstrap, Sass, CSS Modules, Glassmorphic Design

State Management: Redux Toolkit, React Query (TanStack Query), Context API, Axios, RESTful APIs

Tools & Version Control: Three.js / React Three Fiber (3D Web Integration), Git, GitHub, Vite, npm

Core Concepts: RTL Layout Support, Performance Optimization, Cross-Browser Compatibility, Clean Code

PROJECTS

Al Foursan – Real-Time GPS Fleet Tracking System | React.js, WebSockets (Socket.io), Google Maps API, React Query, Redux Toolkit

- **Engineered** a production-grade fleet tracking app using WebSockets for sub-second live GPS data streaming and location updates without page reloads.
- **Developed** custom Geofencing (map Polygons) to track vehicle boundaries and built a smooth historical route playback interface via Google Maps API.
- **Integrated** a real-time notification system triggered by custom WebSocket events to instantly alert dispatchers of route deviations.
- **Optimized** client-side performance and rendering efficiency while handling dense, asynchronous data loads from active moving assets.
- **Demo:** [Live Demo](#)

Invistra Academy – Comprehensive E-Learning Platform | React.js, Redux Toolkit, React Query, Tailwind CSS, RESTful APIs

- **Architected** a dual-role (Instructor/Student) platform with secure role-based access control, interactive dashboards, and financial transaction logs.
- **Developed** an exam engine utilizing Web Fullscreen APIs to penalize tab-switching or exit actions by instantly auto-submitting the exam to ensure integrity.
- **Engineered** full CRUD workflows for courses/quizzes, an online/offline checkout, automated certificate generation, and a 20s short-polling real-time notification system.
- **Built** dedicated operational tabs within the teacher dashboard to smoothly monitor student grading rubrics and direct financial payouts.
- **Demo:** [Live Demo](#)

Form – Premium E-commerce Coffee Platform | React.js, Redux Toolkit, React Query, GSAP, Three.js, Tailwind CSS, I18next

- **Developed** a dual-language (AR/EN) storefront with full RTL layout support, custom skeleton loaders, and a secure checkout with cart persistence.
- **Integrated** an interactive 3D product viewer using *React Three Fiber* alongside high-performance fluid animations driven by GSAP for a premium user experience.
- **Implemented** user authentication, dynamic product filtering, and an event catering booking engine.
- **Optimized** initial page load times and perceived asset delivery by structuring lazy-loaded visual blocks and custom component wrappers.
- **Demo:** [Live Demo](#)

SOFT SKILLS

Problem-Solving, Team Collaboration, Agile/Scrum Methodologies, Technical Communication.

LANGUAGES

- **Arabic:** Native Speaker
- **English:** Professional Working Proficiency
